

## WATER SAVING TIPS

### Bathroom & Laundry

- Take short showers
- Wash laundry with full loads
- Turn off the water while you brush your teeth
- When washing clothes by hand, don't leave the tap running for rinsing

### Kitchen & Outdoor

- Use a basin to wash dishes
- Wash dishes with full loads
- Always turn off running water
- Do not defrost or melt ice under running water
- Avoid running taps when washing fruits and vegetables
- Use a bucket to wash your car and sprinkle your garden
- Fix and repair leaks
- Talk to your family about the importance of water and how to use water wisely

## OUR VISION

Safe water for a healthy nation

# CASH WATER

# Cash Water

- Prepaid system to supply water
- Buy an allocation of water in advance
- It has the same features to current water meter
- It measures water usage the same way as the current meter
- It works the same way cash power does
- It has a life span of over 15 years
- It contains Water Management Device (WMD) that monitors water usage
- A User Interface Unit (UIU) is supplied and used along with the meter
- When water credit bought is used, simply top up your water account as you normally do with your mobile phone.

# Benefits

# The Process includes:

1. Solomon Water team will install the cash water meter after the current prepaid meter
2. Solomon Water will provide free credit worth of 32kl. This is the standard average monthly consumption of a household.
3. Solomon Water will monitor the credit usage daily
4. Customers to report to Solomon Water any issue concerning the meter usage
5. Customer to top up the credit after the free credit trial
